

Rekindle Your Passion for Teaching!

APPLY TODAY FOR A 2024 EARTHWATCH PROJECT KINDLE FELLOWSHIP

Earthwatch is seeking high school teachers interested in experiencing for themselves what a hands-on scientific field expedition might look like for their students! Fellows will receive a fully funded expedition opportunity as well as access to resources that will help them build an Earthwatch group field trip for their students when they return. Complete your online application [here](#). Applications accepted on a rolling basis. Decisions will be made by April 30, 2024.

Project Kindle provided us teachers an experience to participate fully on an expedition similar to what are students will be doing in the field. The 'living classroom' experience goes beyond the actual field work to developing personal, communication, and life skills that one does not get a chance to fine tune until they are put into situations like these.

— 2023 Project Kindle Fellow

Lead Your Students on the Experience of a Lifetime

Earthwatch expeditions are unlike any other travel experience. Our programs can be explained as “service-learning” for science, giving your students the opportunity to work side by side with world-class scientists. We want teachers to feel confident and prepared when they bring a group of students on an Earthwatch expedition.

The Project Kindle Experience

- Experience all aspects of an Earthwatch expedition before leading students on one.
- Explore ways to align your student group expedition with your school’s learning model.
- Gain the confidence, skills, and knowledge to lead student travel.
- Collaborate with a team of teachers and share best practices, ideas, and the spirit of team-based scientific inquiry.
- Join our growing network of nearly 50 years of Earthwatch educator alumni, with special access to our Project Kindle alumni Facebook group, and Google Classroom network, seasonal updates on teaching resources, and professional development opportunities through newsletters and webinars.
