

Bridge the Gap Between Science & the Classroom

2024 TEACH EARTH FELLOWSHIP

Earthwatch's innovative Teach Earth program offers K-12 educators the unique opportunity to work side by side with world-class scientists leading critical conservation research projects. Educators representing all subjects gain confidence in their scientific skills and return home invigorated and inspired to share the experience of real discovery with their students.

This experience has made me a better teacher in so many ways. It has reinvigorated a sense of passion and excitement for teaching due both to the experience itself and the wonderful fellows I got to work alongside. This has made me a more passionate and enthusiastic teacher, which makes my students passionate and enthusiastic alongside me.

— Katie Brown, 5th-grade teacher and 2023 Teach Earth fellow

Real-Life Experiences to the Classroom.

Teach Earth is based upon the principle that every individual can be involved in creating a sustainable planet regardless of scientific skill level.

The Teach Earth Experience

- Immerse yourself in a 7–14 day science-based learning and professional development experience.
- Collaborate with a team of teachers and share best practices, ideas, and the spirit of team-based scientific inquiry.
- Receive mentorship from an experienced Senior Fellow on how to translate your field experience for the benefit of your students and school community.
- Ignite scientific discovery and environmental awareness within your classroom or community through a community action project or lesson plan.
- Join our growing network of nearly 50 years of Earthwatch educator alumni, with special access to our Teach Earth alumni Facebook group, seasonal updates on teaching resources, and professional development opportunities through newsletters and webinars.

ELIGIBILITY

- K–12 classroom teacher in the United States
- Available to travel for 7–14 days in Summer 2024
- Enthusiasm for collaborating with a team of teachers from diverse backgrounds

HOW TO APPLY FOR A 2024 FELLOWSHIP

- Complete your online application by February 26, 2024. Visit earthwatch.org/teach-earth.
- Fellowship notifications will be sent by April 30, 2024.
